

## IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

APPLICATION NO. 10/714,765	FILING DATE 17 November 2003	FIRST NAMED INVENTOR Salvatore J. Puleo Sr.	ATTORNEY DOCKET NO./ CUSTOMER NO. NATREE 3.1-004US 39428
Response To Official Action			EXAMINER Jason Han
ART UNIT 2875		PAGE NUMBER 3	

## AMENDMENTS TO THE CLAIMS

In the Claims, please cancel claims 14 and 19 and cancel claim 20 as provided below:

1-11 (Previously Cancelled).

12-14. (Cancelled)

15. (Currently Amended) A stand comprising:

a support system for supporting said stand;

a shell coupled to said support system, said shell including an inner volume for housing electrical components; and

a cover disposed atop said shell, said cover including an inner volume in contact with said inner volume of said shell, said cover extending beyond a lateral surface of said shell such that said cover has at least one hole disposed on said cover, said hole providing ventilation between said inner volume of said shell through said inner volume of said cover and out to an outside environment, said cover including a receptacle configured to hold a fiber-optic decoration;

an access door disposed on said shell for accessing said electrical components within said inner volume of said shell; said access door including a safety mechanism that prevents said access door from being opened when electrical power is applied to said electrical components; ~~The stand according to claim 14 wherein~~ said safety mechanism is an electrical access opening for accepting an electrical plug, said access door being prevented from opening to enable access to said electrical components when said electrical plug is inserted into said electrical access opening.

## Response To Official Action

16. (Cancelled).

17. (Currently Amended) A stand comprising:

a support system for supporting said stand;

a shell coupled to said support system, said shell including an inner volume for housing electrical components; and

a cover disposed atop said shell, said cover including an inner volume in contact with said inner volume of said shell, said cover extending beyond a lateral surface of said shell such that said cover has at least one hole disposed on said cover, said hole providing ventilation between said inner volume of said shell through said inner volume of said cover and out to an outside environment, said cover including a receptacle configured to hold a fiber-optic decoration;

an access door disposed on said shell for accessing said electrical components within said inner volume of said shell; said access door including a safety mechanism that prevents said access door from being opened when electrical power is applied to said electrical components; The stand according to claim 14 wherein said safety mechanism is an electrical lock that locks said access door, said access door being prevented from opening to enable access to said electrical equipment when power is applied to said electrical components.

18. -20. (Canceled)

21. (Presently Amended) A stand comprising:

a receptacle for holding a fiber-optic holiday decoration;
